

ProjectHub v2.1 — Technical Product Document

Document version: 2.1 | September 2026

1. Product Overview

ProjectHub is a project management platform for small software teams. It provides project tracking, task management, team activity views, and CSV data export.

2. Version 2.1 Changes

Version 2.1 introduces a CSV export feature. Users can export project data from Project Settings. The exported file contains project name, task ID, task title, task status, assignee, and due date.

3. CSV Export

CSV export is available to users with project administrator permissions. The source does not document XML export support.

4. Known Limitations

The document does not specify maximum export size, API rate limits, mobile export support, or XML export functionality. These details should not be assumed.
