

CloudDesk Release Notes — September 2026

Release: 4.6.0

Highlights

CloudDesk 4.6.0 adds dashboard filters, improves report loading behavior, and introduces a new CSV report export option.

New Features

Dashboard filters can be saved. Reports can be exported in CSV format. Users can clear all active dashboard filters with one action.

Important Limitations

The release notes do not state that PDF export, Excel export, scheduled reports, or mobile report creation are available in version 4.6.0.

Audience

These release notes are intended for existing CloudDesk users and administrators.
